

I am requesting the OCSD consider the following changes in order to improve public understanding and participation in decisions of the SSLOCCSD

1. Adopt a bylaw or policy position that sets parameters as to how OCSD Directors appointed to other agencies or committees report back to the whole body.
2. Stipulate that Directors can discuss, in open meeting, their opinions or recommendations regarding a topic under consideration that impacts the OCSD and the appointed Director may refrain from participating in the discussion. In relation to this, consider a requirement for Director discussion of any item which exceeds \$25,000.
3. Adopt a policy position saying that the SSLOCCSD rep, in general, advocates for studying, seeking grants, and pursuing the eventual relocation and upgrade of the treatment plant to a new location, out of the coastal zone and to create recycled water for additional resiliency and supply by 2050.
4. That all OCSD Directors and Senior staff receive public meeting notices from the SSLOCCSD.
